Senior Software Engineer

New Jersey, USA | (848) 261-2492 | paalisha11@gmail.com | [linkedin.com/in/apatel1298](https://www.linkedin.com/in/apatel1298)

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building healthcare and health insurance applications with Java/Spring Boot, React, PostgreSQL, Kafka, and AWS. Lead features from technical design through production release, with a focus on secure APIs, event-driven services, performance, and reliability. Experienced in code reviews, mentoring engineers, production troubleshooting, and cross-functional delivery.

PROFESSIONAL EXPERIENCE Johnson & Johnson

Senior Software Engineer | NJ

Oct 2024 - Present

- **Lead the design and delivery** of Java 17/Spring Boot microservices and secure REST APIs for healthcare applications, applying Spring Security and role-based access control.
- **Build React interfaces** for healthcare applications and integrate Spring Boot REST APIs, reducing time spent on data review tasks by 20%.
- **Optimize PostgreSQL queries and Hibernate/JPA data access** for validation and reporting workflows, reducing report response time by 25%.
- **Develop Kafka producers and consumers** for healthcare event workflows, implementing message validation, exception handling, retries, and failure recovery to improve processing reliability.
- **Deploy and operate Spring Boot services on AWS** using EC2, RDS/PostgreSQL, S3, Lambda, and API Gateway, supporting event-driven processing and production API integrations.
- **Containerize Java services with Docker and maintain Jenkins CI/CD pipelines** using Maven and Git, automating build, test, and deployment workflows across environments.
- **Review code and mentor engineers** on implementation and troubleshooting; lead production issue investigation across React, service logs, and SQL, coordinating defect resolution and releases with development and QA teams.

Oscar Health

Software Engineer | NJ

Jun 2021 - Aug 2024

- **Developed Java 11/Spring Boot microservices and REST APIs** for member, claims, and provider workflows, translating application requirements into backend services and integrations.
 - **Built responsive member and provider screens** using React, JavaScript, HTML5, and CSS, integrating REST APIs and reducing page load time by 20%.
 - **Implemented Hibernate/JPA persistence and PostgreSQL data access** for eligibility and insurance records, connecting backend business logic with application data workflows.
 - **Applied Spring Security and request validation** to support controlled access to protected health information within HIPAA-aligned application workflows.
 - **Deployed and maintained applications on AWS EC2, RDS, and S3** using Docker, Jenkins, Maven, and Git, delivering changes across development and production environments.
 - **Wrote JUnit/Mockito tests** for member, claims, and provider services; investigated backend defects with QA and validated fixes through release.
-

TECHNICAL SKILLS

Languages & Backend: Java 11/17, Python, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate/JPA, REST APIs, microservices

Frontend: React.js, JavaScript, TypeScript, HTML5, CSS3, React Hooks, Redux, responsive design

APIs & Security: OpenAPI/Swagger, Postman, OAuth 2.0, JWT, role-based access control

Data & Messaging: PostgreSQL, SQL, Redis, Apache Kafka, query optimization, transactions, caching, event-driven architecture

AWS: EC2, Lambda, S3, RDS, API Gateway, SQS, IAM, CloudWatch

DevOps & CI/CD: Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Git, Maven, Linux, Bash

Testing: JUnit, Mockito, Jest, React Testing Library, Cypress, unit and integration testing

Observability: Splunk, Datadog, Prometheus, Grafana

AI Development: Claude Code, Codex, OpenCode, GitHub Copilot

EDUCATION

Bachelor of Science in Computer Science Kean

University | Union, NJ

CERTIFICATION

AWS Certified Cloud Practitioner
